Job description

WE ARE CURRENTLY SEEKING an ELECTRICAL SENIOR PROJECT ENGINEER for one of our SOUTHERN CALIFORNIA offices. WEST LOS ANGELES is known for its many popular recreational opportunities and our office is conveniently located adjacent to the Expo MetroLink Commuter line. IRVINE located in Orange County, offers warm weather, beautiful scenery, and one of the top bicycling cities in America with close to 300 miles of on-road bicycle lanes and 45 miles of mountain bike trails. It's one of the safest communities in America and the public schools have consistently ranked among the best in California. VENTURA just 63 miles northwest of Los Angeles and 30 miles south of Santa Barbara, with a backdrop of the Los Padres National Forest foothills and the scenic Pacific Ocean, Ventura residents enjoy miles of beaches and more than 30 parks. The 14.9-mile Ventura River Trail provides walkers, runners and cyclists with an easy connection to the South Coast Bikeway. Ventura's Mediterranean climate offers year-round recreational and cultural opportunities.

I&E PROJECTS INCLUDE Instrumentation and Controls/SCADA * Water Resources * Transportation * Recreational Facilities
* Solar Facilities * Oil Field Applications * Agriculture * Food Processing.

Required qualifications and skills

Must have a bachelor's degree in Electrical Engineering from an accredited college (concentration in power preferred). Licensure in the state of California as a Professional Electrical Engineer required.
Minimum of 5+ years' progressive experience in power design.
Low voltage experience required, medium and high voltage design experience a plus.
Required knowledgeable in NEC (National Electrical Code) and NFPA (National Fire Protection Agency).
Experience with SKM and/or ETAP electrical modeling and design software desired.
Working knowledge in AutoCAD preferred.
Experience in professional networking, developing, establishing, and managing business relationships resulting in new project work for the business a plus.

Responsibilities

working directly with their supervisor to perform the role of lead electrical engineer regarding all aspects of industrial electrically engineered projects including: construction observation, prepare electrical studies, prepare construction and bid set documents (plans, specifications, and engineer's estimates) in connection with the design, construction, and/or maintenance of various engineering projects with emphasis on power distribution, arc-flash, and emergency backup power design. Additionally, the successful candidate may be responsible for proposal preparation and maintaining client relationships in coordination with their supervisor, project managers, and clients with which they work. For a detailed description on job duties, visit www.CannonCorp.us and click on "Careers".
